As 400 Client Access For Mac

Note: The location of the new tool bar items will depend on the location of the cursor at the time of the right-click. The only trouble is that the as400 system must be kept so the other employees wont have to much trouble and it must be able to run it on osX not via bootcamp anymore or parallels. VME1 is designed to connect to MS protocols from the 2004-2005 time frame and received some updates for a while afterwards. The only problem is that the AS400 system needs to be kept so that the other employees dont have too much trouble and it needs to be able to run it on osX not via Bootcamp anymore or parallels. VME3 was designed to connect with MS protocols from the 2004-2005 timeframe and received some updates for a while after that.
